Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach an apparatus and method for generating multiple descriptions of compressed data, the apparatus comprising inter alia a transform module that generates transform coefficients from input data; a quantization module that quantizes the transform coefficients; and, a layering module that generates an energy distribution of the quantized transform coefficients and to group the transform coefficients based on the energy distribution; and, a selection module that extracts a selected number of layers of compressed data from an inventory based on a bit rate requirement to generate the compressed data

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
